

TrueView™
FLEXSCREEN

Everything You Want a Screen To Be!

SIMPLE DESIGN

Our revolutionary design utilizes a PVC coated, high-performance spring steel frame. However, innovation does not need to be complex, so you will not find unnecessary hardware on TrueView FlexScreen.

DAMAGE RESISTANT

We were tired of bent aluminum frames, scratched paint and broken hardware. So we built the TrueView FlexScreen to withstand being thrown from the top of a 5-story building without being damaged!

EFFORTLESS INSTALLATION

Don't overthink this. . . Simply hold the screen in your hands, bend the sides in and fit TrueView FlexScreen into your screenrack. It's that easy!

BEAUTIFULLY INVISIBLE

TrueView FlexScreen hides the window screen pocket, drastically improving sight lines and eliminating the need for color matching. Your window will never look better!

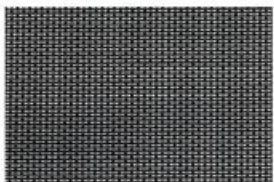

Nearly Indestructable. Barely Visible.

TrueView FlexScreen Screen Cloth Upgrade Options

Tough Screen

- strong vinyl-coated polyester
- mildew and fade resistant
- occasional cleaning with mild soap and water
- pet resistant

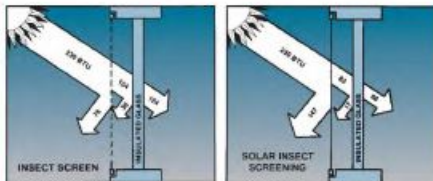

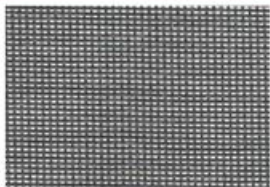

Black

Solar Insect Screen

- ultimate in insect protection
- stops up to 65% of the sun's heat and glare
- improves daytime privacy while offering excellent outward visibility

Charcoal

- Regular Fiberglass Insect Screening (chart on left) offers about 30% shading.
- Solar Insect Screening (chart on right) blocks up to 65% of the sun's hot rays.
