

How to Measure is the Key

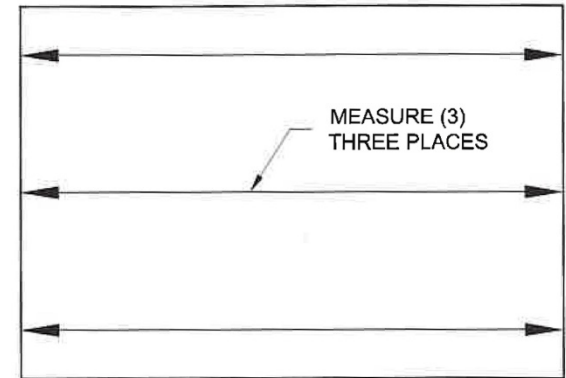

- Interstate windows are manufactured on the $\frac{1}{4}$ inch and only window make size.
- All architectural shapes must be accompanied by a make size template.
- For New Construction, cutback $\frac{1}{2}$ " on width and height.

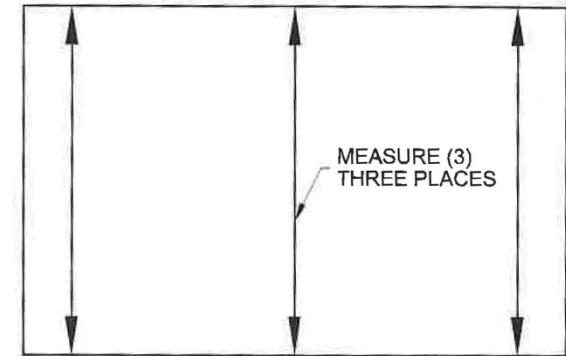

3 Critical Measurements

Use the smallest dimension when determining the window size. Make size will be based on the smallest rough opening measurement on the $\frac{1}{4}$ inch on the width and the height.

Width

Height

Squareness (Diagonal)
